MAY 18-20, 2012

# Welcome to FUDCon

I say that a bit oddly -- I'm sad that I cannot myself actually be in Kuala Lumpur to join the Fedora contributors and those who have come to learn about Fedora and free and open source software for this event. Never fear, though, you are in good hands: I know that the leaders of Fedora who are present will make this event successful, and that the future leaders among you will make the best of their opportunities to grow and contribute in new ways. Most importantly, I know that the local team who put together this FUDCon will do a fantastic job in their own right to make you all feel welcome at this event.

A few additional notes:

- \* READ THIS BOOKLET! It's filled with good information -- the schedule, information about where to be and when to be there, maps, and more.
- \* Please do your best to be on time, and stick to the conference schedule! You're in Kuala Lumpur to learn, share, and Get Things Done -- make the best of your time here.
- \* Remember that the majority of Fedora contributors aren't at this FUDCon with you -- but we do want to hear about what you're learning and accomplishing. See inside for information about using IRC, blogging, and microblogging your experiences to share with others.

I'd like to thank the Asia Pacific University College of Technology and Innovation (UCTI). Their help, support, and generosity in providing facilities for this event make it possible for us to gather here today.

Last, but not least: This event would not have happened without the hard work of the local FUDCon planning team. If you see them, shake their hand. Heck, even give them a hug! It's no small feat to put together an event like this, and I hope that everyone reciprocates the team's hard work by making the best of the FUDCon experience for themselves.

I know that you will all have a fantastic time at FUDCon: Kuala Lumpur. You'll do great things this weekend -- get to it!

Big hugs from across the pond,

Robyn Bergeron  
Fedora Project Leader

# Support

FUDCon Kuala Lumpur is made possible through support from these organizations

# Getting Started

Greetings from the FUDCon Kuala Lumpur Organizing Team!

Welcome to FUDCon Kuala Lumpur 2012!. This is our first ever FUDCon in Malaysia and we are excited to have you here!. With only less than 3 months of planning and a small core organizing team who works on voluntary basis, we hope everything will go perfectly throughout the day and everyone enjoy themselves throughout this event. However, we deeply apologize if there are any shortcomings.

Please do read this guidebook as it contains important informations about the event and venue. We did our best to include any relevant informations, but we might have missed something. If you have questions please do not hesitate to contact the organizing team.

FUDCon Kuala Lumpur is organized using a hybrid Conference+BarCamp format. We have some fixed sessions, but new sessions may be added throughout the event, so do check up our agenda page on the website regularly during the conference. We will also be having whiteboard with the agenda around.

Hashtag for the event is **#fudconkl2012**, do tag your social media posts and photos using this tag so that everyone can search, track and see them easily.

Announcements during the event will be posted on **Fedora Malaysia Google+ (<http://gplus.to/fedoramy>)** and **Twitter (<http://twitter.com/fedoramy>)** page under the tag **#fudconkl2012**, so do subscribe to them for announcements.

If you blogged about this event, do post a link to it under the hashtag. We are interested to know your experience and learn if there are anything that we can do better.

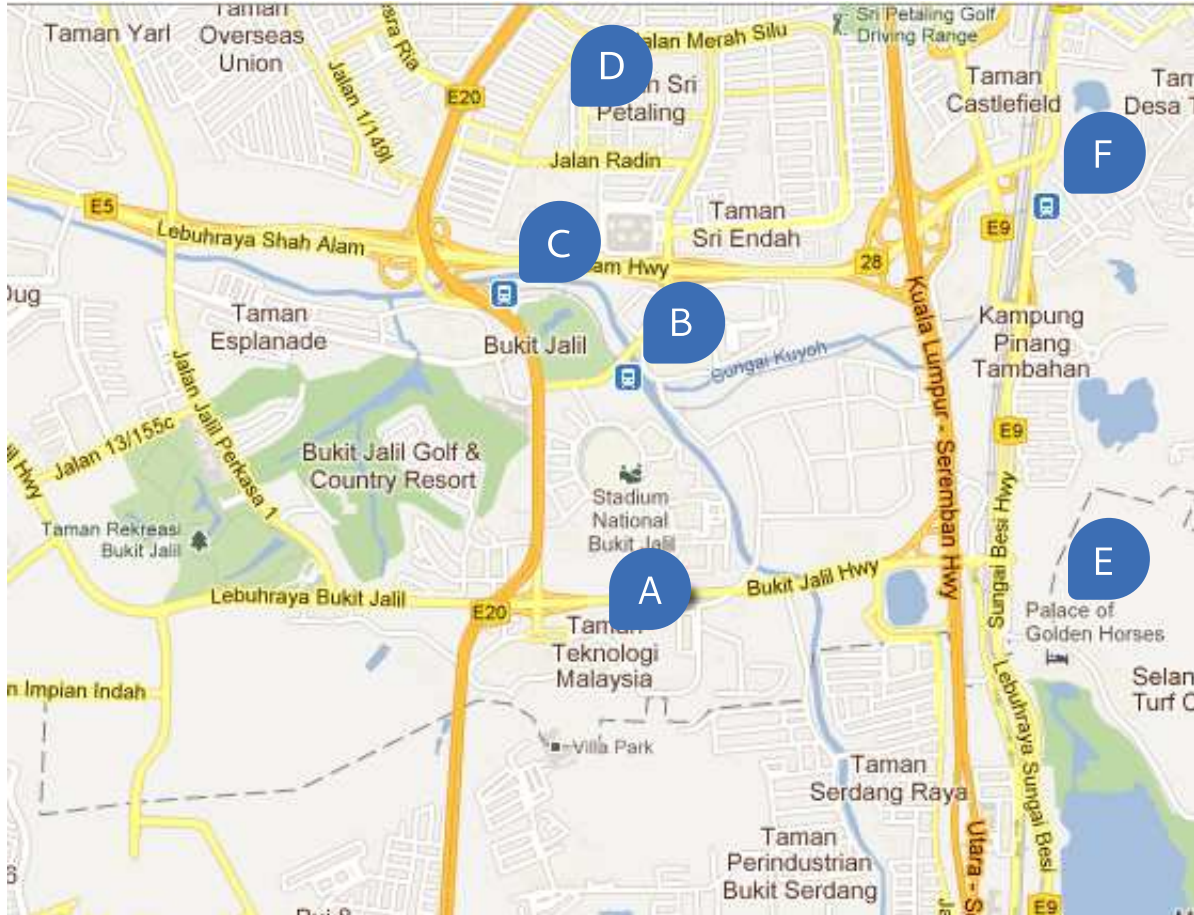

Hope you enjoy FUDCon Kuala Lumpur, learn something new, get stuff done, work on something new, and have fun along the way!!

Mohd Izhar Firdaus Ismail (a.k.a KageSenshi)  
Fedora Ambassador &  
FUDCon Kuala Lumpur 2012 Coordinator

## Hashtag: #fudconkl2012

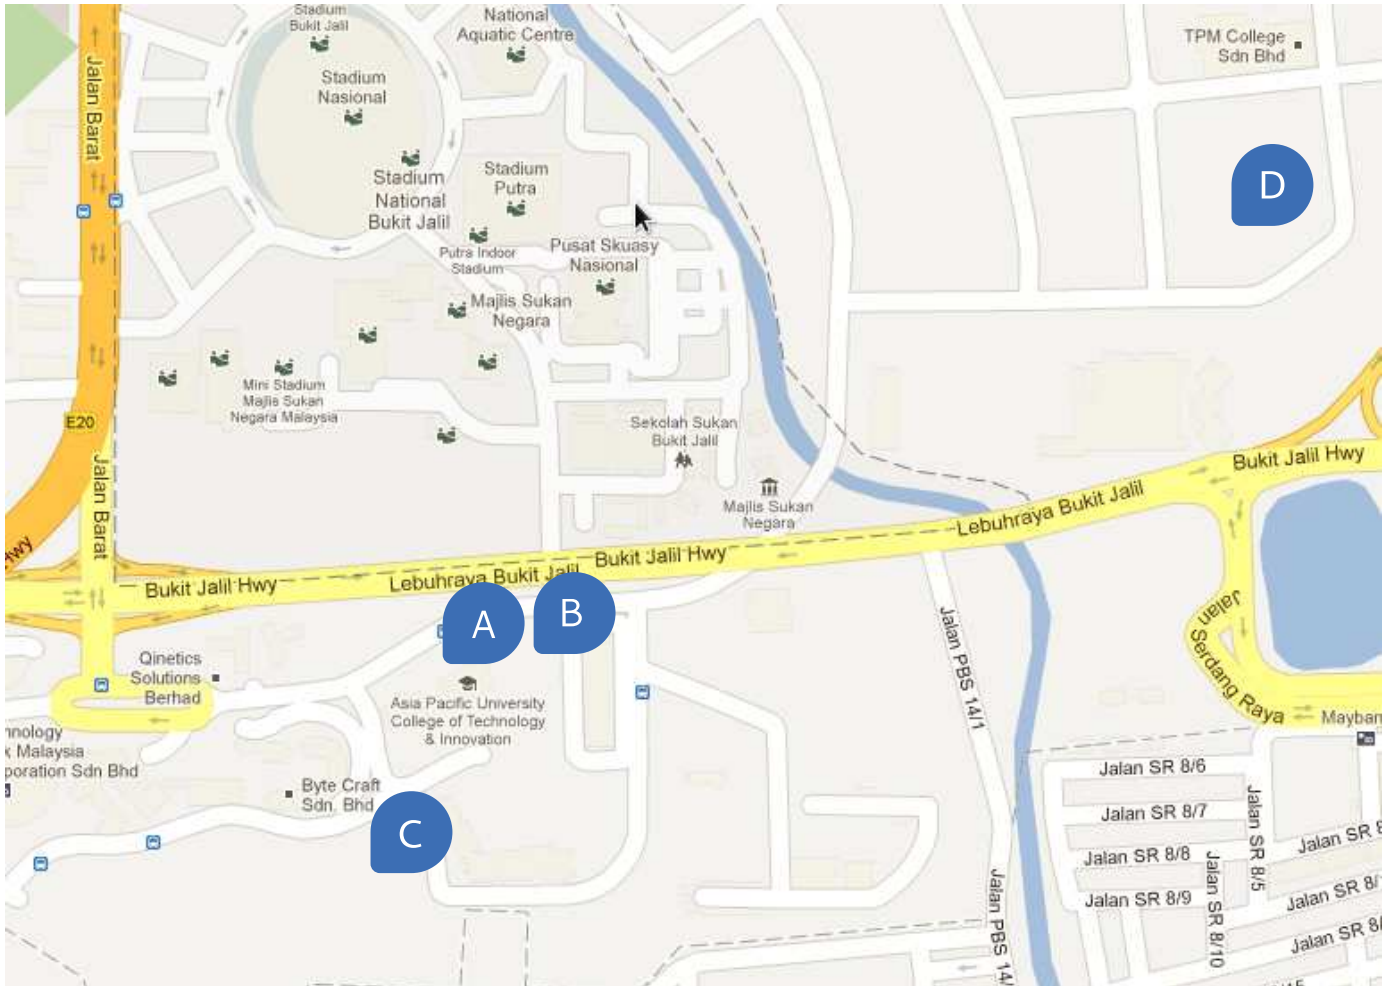

# Location

- A** UCTI, Technology Park Malaysia  
Bukit Jalil, KL, Malaysia
- B** Rapid KL Train Station: Bukit Jalil
- C** Rapid KL Train Station: Sri Petaling

- D** Sri Petaling Hotel
- E** The Palace Of Golden Horses Hotel
- F** Rapid KL Train Station: Sungai Besi

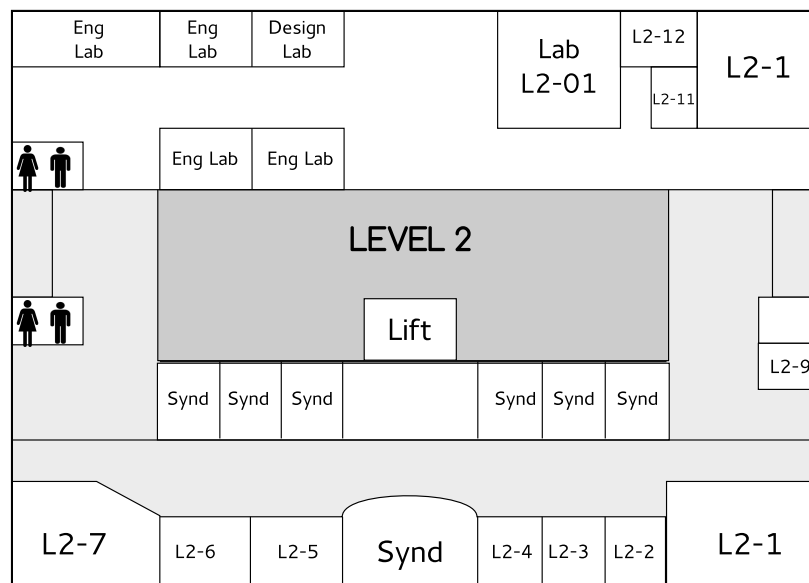

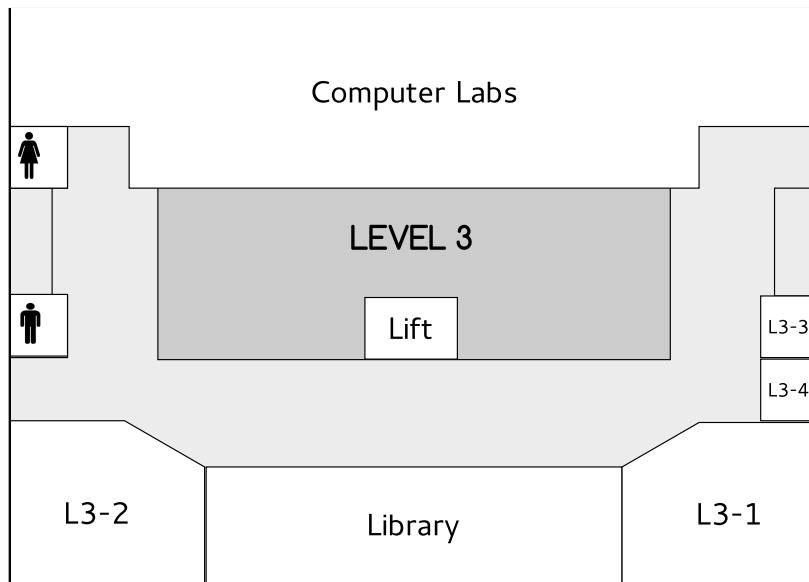

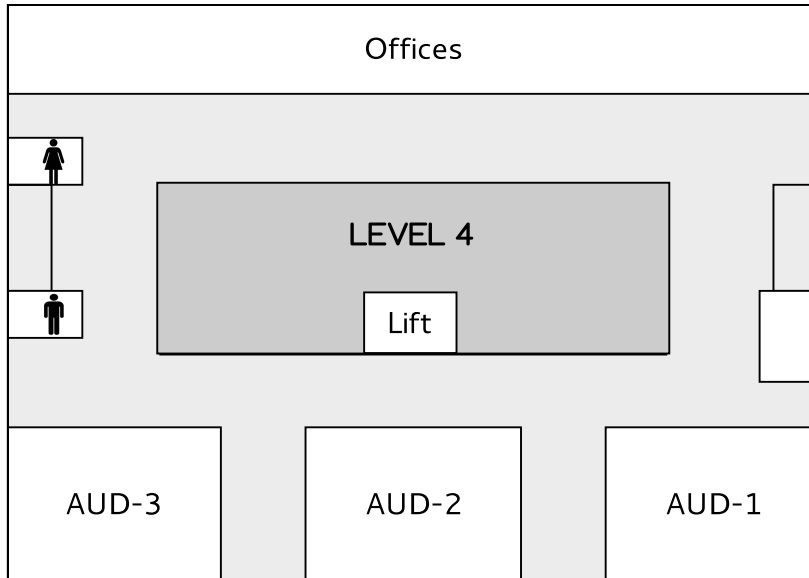

# Parking Areas

- A** UCTI, Technology Park Malaysia  
Bukit Jalil, KL, Malaysia
- B** Parking #1 (only on Saturday & Sunday)

- C** Parking #2
- D** Parking #3 (shuttle provided)

# Floor Plan

# Other Venue Info

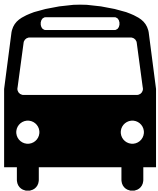

Surau/Musholla is located at ground floor.  
Directions to be provided on the day

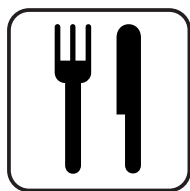

No smoking permitted within campus perimeter. Smoking only permitted at carparks.

Wireless SSID is called 'fudcon'. The key is 'fudconkl2012'

There will be shuttle bus provided from/to Sri Petaling LRT station in the morning and afternoon. There will also be shuttle bus to the mosque on Friday. Look out for FUDCon/ Fedora logo.

First 50 attendees of each day will receive free food coupons to redeem food from the organizing committee. Nonetheless, **UCTI cafe will be open throughout FUDCon.** Remaining attendees may purchase food at the cafe.

## What is FUDCon

FUDCon is the Fedora Users and Developers Conference, a major free software event held in various regions around the world, usually annually per region. FUDCon is a combination of sessions, talks, workshops, and hackfests. FUDCon is always FREE to attend for anyone in the world.

## FUDPub

FUDPub is a social night held during a FUDCon. For FUDCon Kuala Lumpur, we will be having a dinner on Saturday night. Seats are limited to 50 however, so it is by invitation only. Be actively contributing throughout FUDCon and you may get a chance to be invited!

## Hangout & Exhibition Room

We have one room allocated for hangout and exhibition. If the talks are of no interest to you, do hangout in the hangout room.

Local communities who wish to have a desk there for exhibition or other activities, please contact the organizing team and we'll arrange one for you if the space permit.

## Blogging

If you are writing blog posts about FUDCon, we welcome you to join us on Fedora Planet requires a FAS account that has signed the CLA and is approved for one additional group. If you are new to Fedora but know someone who would be willing to add your blog to Planet, ask them.

If you were sponsored to come to FUDCon, we request that you write at least one blog post for Planet.

[planet.fedoraproject.org](http://planet.fedoraproject.org)

## IRC Channel

FUDCon main IRC channel on Freenode is **#fedora-fudcon** and Fedora Malaysia IRC channel is **#fedora-my**. If you are transcribing a session, please report the session name and IRC channel to the main channel. If you are using Gobby or EtherPad in your hackfest, please make a note of this in the main channel as well.

## Microblogging

Microblogging is one of the best ways to promote FUDCon and receive timely updates from event organizers and attendees. Use the hashtag **#fudconkl2012**, which can be monitored from your microblogging client.

## What's a BarCamp conference?

Parts of FUDCon Kuala Lumpur (especially Day 1) is organized in an ad-hoc fashion, inspired by BarCamp events (<http://www.barcamp.org>)

BarCamps are participant-driven events, and anyone who wants to run a session is invited to do a pitch. Your pitch advertises your talk and convinces other people to vote for it and attend.

After the pitches, conference participants will quickly vote on which pitches they would like to see the most. The session titles will be posted on the wall on pieces of paper. Each participant should make a vote mark on the session proposals that interest the most, marking as many proposals as they like. Voting allows the organizers and participants to reduce conflicts, combine two like subjects, or remove sessions with low interest.

Scheduling of sessions is also a collaborative effort. Speakers and attendees work with each other to eliminate conflicts and produce a logical schedule. Once the schedule is completed, it is transcribed to the wiki for everyone's reference.

We only have 60 minutes for the introduction, pitches and scheduling, so it is incredibly important that we start on time and that we stay on topic and on our schedule.

The Rule of Two Feet is encouraged. This rule is simple: You are not required to stay in a session that loses your interest. If you find the presentation is not what you thought it would be, use your two feet to find an alternative session. If you'd like a session leader to cover a different kind of material, ask them about it. (Nicely, of course - we value courtesy along with flexibility)

Sound confusing? In principle, you'd be right. In practice, though, this process results in a dynamic engaging and information-packed event. The combination of collaboration, flexibility and user-driven content makes it nearly impossible to leave the conference dissatisfied. Once you've experienced a BarCamp style event, you may find you enjoy it more than other formats!

# Sessions (Day 1)

FUDCon Kuala Lumpur is organized by the Fedora Malaysia community. We are a group of Fedora users and contributors who regularly meet up to share knowledge, and organize activities to spread Fedora and Free / Open Source Software and philosophy in Malaysia.

The current community have been around since 2007 and have been involved in many local FOSS and tech events , promoting Fedora and FOSS and even being in the organizing committees, such as FOSS.My, BarCamps, GeekCamp, and other local conferences. Our community members also involved or helps out various local FOSS and tech groups such as Python Malaysia, Hackerspace Kuala Lumpur, OSDC.My, Mozilla.my, OpenSuSE Malaysia, and OWASP.my.

Since 2011, we regularly organize **Fedora Activity Days (FAD)** using the BarCamp conference format at least once every Fedora release to share knowledge, hack on things, contribute to Fedora, and learn some new stuff. Do join us when we announce our next FAD!! . Also, if you are interested to organize a FAD at your place, please don't hesitate to do so. Just inform us so that we can find ways to help you out. Same goes if you are running a FOSS event and wish for our community involvement (eg: present talks, run activities), please don't hesitate to contact us. We will do our best to aid you.

# Future Activities

The next FUDCon for Asia Pacific region will be run in another country, so there will not be any FUDCon in Kuala Lumpur for at least another 1 or 2 years.

However, despair not, as Fedora Malaysia community will be running Fedora Activity Days at least twice a year. These Fedora Activity Days can be as big as FUDCon but we will need your help for that!. If you have something to share, even small beginner topics, do contribute by submit them as sessions in the FADs. Together, we can grow the local community and hopefully turn Malaysia to one of the major country of FOSS contributors in Asia Pacific, alongside other countries such as India, China, Japan and Australia

We hope, by the time FUDCon Kuala Lumpur happens again, we will see more sessions from local users and contributors, and we are able to organize more advanced activities (eg: enhance the next Fedora release, hackfests to develop new features for FOSS apps, hackfests to fix bugs) and work alongside contributors from around Asia Pacific and the World.

Look out for announcements of our future Fedora Activity Days on our social media channels and see you in our next FAD!.

fedora<sup>f</sup>  
ACTIVITY DAY

Thank You For Attending  
FUDCon Kuala Lumpur 2012
